

Walkway Mats | Provides a safe walkway for construction sites, roofing and other work areas

Wakulla Walkway Mat is an innovative product made out of extruded pvc and sprayed in a loop pattern. It is specifically made to use on walkways and construction sites to provide a clear and safe walkway zone on any surface, finished or unfinished.

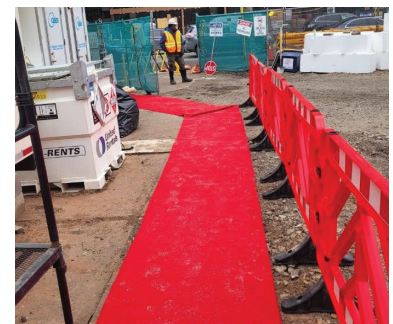

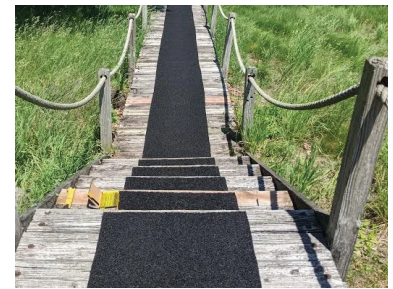

What are the benefits to use your product?

Our walkway mat is suitable for any ground, whether it is prepared or unprepared. It provides a durable, slip resistant walkway in wet or dry conditions. In addition it creates an easily recognized pathway that can be color coded for different work zones and site conditions. On building roofs it can protect the surface from falling tools and debris.

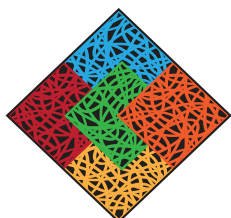

How does your product help other industries, where else might people find your products useful?

There are many other applications such as marine (boating), shower areas, patios, pools, zoos and aquariums, and soundproofing etc. Manufacturing facilities use backed mats between the isles to help collect the debris dropping from the work stations and help reduce the fatigue from standing long hours.

- Easy to install and maintain
- Strong and lightweight
- Resistant to wind uplift
- UV stabilized and resistant to environmental and chemical degradation
- Creates safety zone areas

Perfect for outdoor walkways and stairway applications, work zones, etc.
